

Steel Water Pipe Century Club

"100 Years of Service"

STI/SPFA's Century Club honors the owners of steel water pipe and/or systems that are at least 100 years old and still in active service. Providing potable water to the nation is a vital service. Owners of these systems recognize that steel's durability, longevity and strength make it the ideal material for use in potable water infrastructure.

If your steel water pipe and/or system have been in active service for at least 100 years, we invite you to enroll in the Steel Water Pipe Century Club. When your enrollment is accepted, you will be listed on our Century Club website page and we will publish a press release presenting your entry as a Century Club honoree.

How to enroll

1. Provide verification of your steel pipe and/or system's age, such as dated engineering documents, minutes from a village board meeting, a dated purchase order, a local newspaper clipping or similar document.
2. Describe your steel water pipe and/or system's history, importance to your community and any anecdotes or information you want to share.
3. Provide a digital or original photo of your steel water pipe and/or system, if available.
4. Complete the form below. You may complete it on-screen and save it to your computer, or print and complete it by hand.

ENROLLMENT FORM

OWNER INFORMATION:

Owner company/government unit

Pipe/system location (city, state)

Operational since (year)

Verification provided Yes No

Population served (number)

Pipe/system length (number)
