

Steel Pipe Fabrication Category Winner
Mid-America Pipe Fabricating & Supply, LLC – Scammon, KS

Our company supplied the steel pipe for Phase II of the Lewis & Clark Regional WTP. This included piping for the filter gallery in the lower level of the main plant building. There was over 2000 feet of 54", 48", 42", 36", 30", 24" & 16" pipe packed into the 170 foot long gallery.

Also provided along with the steel pipe were fabricated reducers, elbows, saddles, harnessed sleeve couplings, mechanic couplings and reducing elbows. Pipe was furnished with zinc-rich primer and cement mortar lining.

In addition to the interior pipe, we also furnished 2535 ft. of 72", 54" and 30" buried pipe that was polyurethane coated and cement mortar lined.
