* Note that this list was generated from information provided by the various manufacturers listed. No independent research has been conducted to verify or deny the manufacturers' claims of compatibility. It should also be noted that Underwriters Laboratories has expressed concern that some manufacturers may be reporting that their particular product is UL-Listed for the various biofuels because it does carry the UL-Listing for petroleum products. Underwriters Laboratories would like to inform the industry that there is a separate qualification process for biofuels and each product must be tested for the product that it is going to be in conjunction with for the UL-Listing to be valid. For more information contact Underwriters Laboratories, Inc., 1285 Walt Whitman Road, Melville, NY 11747-3081, Attention: Roland A.
